4-H & NC State:
LEADING TOGETHER

Exhibit Information:
This exhibit provides a fresh look at the longstanding relationship between 4-H and North Carolina State University. Both 4-H and NC State are dedicated to producing outstanding citizen leaders. The relationship between the program and the University is unique: 4-H is the only youth organization based at the land-grant university. 4-H often serves as the first exposure many youth have with the world of higher education. Through 4-H programs, young people master skills to make career and life choices; connect with communities; learn to give back to others; and become independent thinkers. NC State University and the Department of 4-H Youth Development and Family & Consumer Sciences is uniquely positioned to respond to some of the most important issues facing North Carolinians today.

The exhibit will be open from January – June 2011
