South Central District Strategic Plan - Use of Technology

Committee Members:
   Glenn Woolard
   George Autry
   Everett Davis
   Susan Hamilton

Goals of the Strategic Plan:
1. Make technology usage a part of EMAPS and Work Plans in every county in the district
2. Urge Administration to make our system compatible with the rest of the working world in hardware and software selection.
3. Suggest to Administration that additional IM agents are needed to educate county staffs on programs that are useful and timely
4. To encourage all counties to use their websites more as a delivery mode for interactive on-line education.

Strategies:
1. Survey the district to determine the skill level of each staff member, the types of software being used, and the use they are making of what they have.
2. Encourage CEDs to have each employee include technology usage in either their EMAPS or their Work Plans.
3. Look at grant possibilities for obtaining more computer equipment and training.
